

# ICPP Accumulation Fund

## Investment Strategy

The objective of ICPP Accumulation Fund (Fund) is to provide long-term capital growth and income through a portfolio of large cap Canadian and foreign equities that are sufficiently diversified to minimize investment risk. The Fund will invest in equities of companies that are part of the ICPP Total Index (Index).

The companies that are included in the Index are listed on major stock exchanges in Canada and the United States. Index companies are selected based on the long-term viability of their businesses and value added return expectations within their industry. It is expected that equities of the eligible companies listed in the Index may be bought and held by a fund over a long time horizon. The Fund and Index are generally composed of large capitalization equities only. Minimal amounts of cash balances are used to facilitate rebalancing and collection of dividend income. The Index will include between 72 and 80 equities normally balanced between Canadian and US dollar investments. The Fund will include between 36 and 80 equities.
